Domain Experience

Vodafone EOM

- Developed and maintained full stack application, enhancing functionality by adding new fields and features across the frontend, backend, and database using **Angular** and **java**.
- Implemented **RESTful APIs** for seamless data integration between front-end and back-end.

Curriculum Vitae

- Worked closely with the application on **testing** and **debugging**, ensuring high-quality deliverables. Optimized application performance.
- Utilized MySQL Workbench to enhance data retrieval efficiency and application performance.
- Conducted thorough **unit testing** to ensure application reliability, successfully deploying updates with minimal user disruption.
- Ensured robust **MYSQL database connectivity**, implemented **Exception handling**, and conducted comprehensive **JUnit testing**.

Cumulocity IOT
- Worked on a POC
- Created a spring boot and react/angular file uploading/transfer system.It is afterwards published on the **Cumulocity IoT** platform.
- Initially created an application for file upload. In that application user can upload their files download files as well. Cumulocity is an IOT platform where we can manage and control our devices remotely.
